

Prevent Failures Before They Happen

Experience SAM GUARD Free for 90 Days

Every plant says they want to be digital and data-driven. Few actually are. Let's change that in **30 days**.

With SAM GUARD, you can move from reactive problem-solving to proactive operations - **in just weeks**. No hardware, no budget, no risk.

We're offering a **full 90-day trial** of our AI-powered fault detection platform.

Test it, challenge it, see the results for yourself.

SAM GUARD transforms industrial data into actionable intelligence, serving as the brain behind your machines.

We empower teams with smart decision-making tool that enhance productivity, reduce downtime, improve energy efficiency, and **minimize environmental impact**.

With SAM GUARD, companies don't just monitor their production lines - **they gain the wisdom to stay ahead in an increasingly complex industrial landscape**.

What You Get

Up to 500 tags monitored

Full onboarding and configuration by our expert process engineers

No hardware or sensor changes required

Fully deployed in within 3 weeks

All We Need From You

Credentials and access to process historian or DCS data

A Process Engineer to support setup and onboarding

P&ID diagrams or DCS screenshots for process understanding.

I'm in Let's talk

Why Companies Choose This Offer

-  You've already finalised your budget – but still want to **explore options**
-  You're exploring digital transformation – but need **proof of value**
-  You want early detection capabilities – but without **upfront risk**

Take the First Step – Risk-Free

SAM GUARD helped global plants reduce downtime, catch critical failures early, and transform maintenance strategy.

Now it's your turn.
