## **SAM DISTRICT ENERGY: SAMSON Asset Management for District Heating and Cooling**

With SAM DISTRICT ENERGY, the first business solution from the SAM DIGITAL product line goes online. SAM DISTRICT ENERGY is tailored to the specific requirements of the district heating and cooling market. The web-based application is designed to manage, control and optimize heating and cooling systems. Its main features include convenient recording of consumption meter readings, traceability of heat supply delivered, ensuring fault-free operation, efficient alarm management and targeted diagnostics. The cloud-based, digital SAM DISTRICT ENERGY solution integrates customer data as well as historical data of the connected equipment. In line with the latest standards and to ensure data security, the data are exclusively saved in professionally managed computing centers in Germany.

### **About SAM DIGITAL**

SAM DIGITAL is a solution devised to meet the growing demands for digitization in process automation applications. At the heart of the new digital product line is SAM DIGITAL HUB, SAMSON's state-of-the-art digitization and automation platform.
