## PRESS RELEASE

PI 02/2019 · 26 June 2019

SAMSON plans to further drive its market share in control valves, butterfly valves and modular automation units for use in all areas of process engineering. The product range also includes the associated valve accessories, such as state-of-the-art transmitters, controllers and automation systems. They serve as the connecting link to digital applications and products. SAM DIGITAL, SAM GUARD and other solutions round off the product portfolio. They turn SAMSON into a provider of solutions to optimize life cycle management and customer processes.
